DETAILED ACTION

Response to Amendment

1. This communication is responsive to the applicant's amendment filed on 06/19/2008. The applicant(s) amended claims 1 and 3, and cancelled claims 5-28 and 34-35 (see the amendment: pages 2-4; also see Examiner's amendment below).
2. The examiner withdrew the previous claim rejection under 35 USC 103, because the applicant amended the claims by respectively combining previous independent claims 1 and 3 (method claim having the same or similar limitations as apparatus claim 1) with the limitations of the previous dependent claim 34, which was objected to "as being dependent upon a rejected base claim but would be allowable if rewritten in independent form" (see the previous rejection filed 12/19/2007), and deleting all other independent claims (and their dependent claims).

Examiner's Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
4. Authorization for this examiner's amendment was given in a telephone interview with the applicant's representative, David W. Rouille (40,150), on 06/26/2008 and 07/02/2008. The Examiner's Amendment is as following:

In the claims:

Claim 1, line 22 of the claim, after “the output of the first executable”, insert, insert -- resource--; and at the end of the claim, insert --,--.

Claim 3, line 21 of the claim, after “the output of the first executable”, insert, insert -- resource--; and at the end of the claim, insert --,--.

-----End of Examiner's Amendment-----

Allowable Subject Matter

5. Claims 1, 3-8, 10-13, 15-20 and 22-25 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding independent **claims 1 and 3**, the instant application is directed to a system and method for providing text-to-speech conversion of a body of text. Each of the claims, combining certain well known features in the art, identifies the uniquely distinct features of:

wherein the first executable resource generates text portions for the body of text by dividing the body of the text into the text portions, and

the output of the first executable is a sequences of uniform resource locators (URL) for each text portion, the uniform resource locator comprising a name of a resource for converting text-to-speech and the words of a divided text portion separated by delimiters.

6. The prior art of record, LADD et al. (US 6,269,336 B1) and MACKENTY (US 6,088,675), provided numerous teachings and techniques for interactive services in a network environment, providing voice browser, text-to-speech conversion, speech recognition, navigating information resources and responding to the content request with HTTP and URL, sending at least a portion of the request information including text content and markup language document or pages; converting a text into HTML document having multiple portions with associated URL and text portion. However, the combined features stated above are not anticipated by, nor made obvious over the prior art of the record.
7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
